

## Press Release

### 12,000<sup>th</sup> jogger is delivered to commercial printing house in Krobia, Poland

In May 2008, Shorewood Poland Sp. z o.o. received not only the POLAR L-R-115-T cutting system it had ordered, but also the 12,000<sup>th</sup> automatic jogger worldwide.

POLAR joggers have been ensuring cutting reams with precisely aligned edges everywhere in the world since the mid-1960s. This is why Shorewood, as well as all the other global customers are regarding this automatic jogger no. 12,000 as a synonym for 40 years of know-how in high-quality jogging.

With a staff of 150 Shorewood has gained reputation as a commercial printer in Poland since 1995. President Waldemar Kulczynski is delighted about the delivery of this very special machine within a cutting-system. The purchase of this system was an easy decision for the Heidelberg customer, because it is part of a measure to adjust productive capacity to the demand. "While maintaining almost the same level of productivity this system replaces three stand-alone machines", he says enthusiastically.
