

## Press Release

### **POLAR at the Labelexpo Americas for the first time**

**After its successful presence at the fairs in Brussels, POLAR will now be exhibiting at this year's Labelexpo Americas in Chicago for the first time.**

From 9 to 11 September POLAR will be presenting its products together with Heidelberg USA in Hall 7, Stand # 5721, close to the Gallus stand.

A stand-alone DC-M die-cutter and the POLAR 92 XT high-speed cutter along with the new BS-23 single-head bander will be shown. With its LabelSystems POLAR is covering the entire label production range for both die-cut and square-cut labels. It includes not only the DC-M stand-alone die-cutter, but also automated cutters for label cutting, system die-cutters and highly complex automatic banding machines, and other components, which allow to perform an industrial label production with high production runs.

In Chicago Michael Neugart, Managing Director of POLAR, is expecting to welcome many visitors and interested persons who are dealing with the production of wet glue labels.
