

for automatic banding of square-cut packs.

Customer benefits

- Very easy to handle
- Improved banding quality compared with manual packaging
- Integrated into the work cycle it requires no further manual handling
- Pile can be automatically banded with 1 – 4 bands
- Very flexible thanks to short conversion time

Description of the machine

The BT single-head bander is mostly used for offset size 50 x 70 cm. The completely cut packs are manually pushed onto the LT-B loading table which is positioned at the same working level. With the push of a button the label rows are automatically moved forward, separated by a pin feed drum and transported to a loop bander. Once the label stacks are banded they are pushed out.

Technical data

Label size, min.	40 × 50 mm 1.57 × 1.97 in.
Label size, max.	170 × 750 mm 6.69 × 29.53 in.
Stack height min.	30 mm 1.18 in.
Stack height max.	125 mm 4.92 in.
Performance max.*	19 cycles / minute

* depending on material, label size and banding
